Essential and Reasonable Support

NDIS funding is allocated based on the concept of 'reasonable and necessary' support, ensuring that participants receive funding for services that are essential and directly related to their disability, enabling them to achieve their goals and maximise their potential.

Empowering Choice and Control

NDIS operates on the principle that individuals with disabilities have the right to make decisions about their own lives, including the support and services they receive, empowering them to exercise autonomy and independence.

Individualised Planning

NDIS adopts a person-centred approach, with each participant undergoing a personalised planning process to identify their unique needs, goals, and aspirations, ensuring that support and services are tailored to meet their individual circumstances and preferences.
